## DETAILED ACTION

### *Oath/Declaration*

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The oath filed May 18, 2006 states "I acknowledge ... material to the examination ... 1.56" (emphasis added), and lacks the required phrasing --I acknowledge the duty to disclose information which is material to patentability of this application in accordance with Title 37, Code of Federal Regulations Section 1.56-- (emphasis added).

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Wonn (3901030).

Wonn discloses a torque converter having a pump (12) having an annular pump shell (18) mounted on a pump hub supported in a housing so as to rotate, and a plurality of impellers (22) radially arranged in the pump shell, a turbine (14) having an annular turbine shell (42) arranged facing the pump and mounted on a turbine hub which rotates relative to the pump hub, and a

plurality of runners (46) radially arranged in the turbine shell, a stator (16) arranged between the pump and the turbine and is supported by the housing, and an operation fluid filled in the pump and in the turbine, wherein transmission torque limit means (~105) is arranged between the stator and the housing to so limit the transmission of torque transmitted to the stator from the pump through the turbine as will not to increase in excess of a predetermined value.

***Allowable Subject Matter***

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
